

## HDPE Repro (100% PCR)

### Fractional Melt HDPE Pellets

Superior quality HDPE fractional melt ( $0.35 \text{ g}/10 \text{ min} \pm 0.10$ )<sup>1</sup> pellets derived from 100% post-consumer HDPE blow grade bottles. This material is pelletized through a double degasification/devolatilization process with an ultra-fine mesh laser filtration system. Suitable for a wide variety of contaminant and melt-flow sensitive extrusion and blow molding applications including production of pipes, tubes, liners/film, sheet, plastic lumber, bottles, and more.

Item # / Quick Lookup:

**HBPM50**

#### Technical Specifications

Melt Flow (MFI)  $0.35 \pm 0.10$ <sup>1</sup> g/10 min

Density 0.956 (avg.)<sup>2</sup> g/cm<sup>3</sup>

Color Grey

PCR Content 100%

Process Degassed and devolatilized, laser filtered

<sup>1</sup> ASTM D1238-10

<sup>2</sup> ASTM D792-20

#### Packaging & Configuration

Standard Packaging FIBC bulk bags\*

Avg. Weight/pkg As specified

Avg. Weight/FTL 42,000 lbs

\*Gaylords available upon request
